

**S2 Table: Number of SNPs and length of genetic linkage maps in *D. lotus***

Genetic maps for the four parental lines of the two mapping populations (KK and VM), were built using the pseudo-test cross method. All linkage groups were anchored to the 15 chromosomes of the *D. lotus* draft genome assembly. The sex-determinant locus was mapped to linkage group 15, suggesting the Dlo15 is the sex chromosome. More detailed information about the maps and SNPs are available from the Persimmon Genome Database (<http://persimmon.kazusa.or.jp>)

Chromosome name	Consensus map		KK genetic map				VM genetic map			
			Kunseishi-female		Kunseishi-male		Kunseishi-female		Budogaki-male	
	No. of SNPs	Map length (cM)	No. of SNPs	Map length (cM)	No. of SNPs	Map length (cM)	No. of SNPs	Map length (cM)	No. of SNPs	Map length (cM)
Dlo01	435	223.8	140	218.4	204	208.5	154	176.0	144	110.6
Dlo02	723	132.4	307	157.9	175	162.8	148	183.1	316	132.1
