

S8 Fig.

S8 Fig. Mtl1 mediates interaction between Rrp6 and Mmi1.

Expression of *rec8* mRNA and *spo5* mRNA in *mtl1-cs5* cells expressing Mtl1 and Rrp6-GFP-Mmi1 from plasmids. Cells were grown in liquid MM medium at 30°C and shifted to 20°C for 2 hours. Transcripts were quantified by RT-qPCR and normalized to *act1*. Error bars represent standard error of three independent samples. * $P < 0.05$; ** $P < 0.01$ compared with cells carrying empty vector at 20°C (Student's *t*-test).
