S2 Fig. Probability of EuroFIT being cost-effective compared to the comparison group

Figure: Cost-effectiveness planes and cost effectiveness acceptability curves for each outcome: QALYs = a, b; Daily steps (activPAL) = c, d; Sedentary time (activPAL) = e, f; Meet physical activity guidelines (IPAQ) = g, h; Total physical activity (IPAQ) = i, j; ≥5% decrease in weight = k, l.
