STROBE Statement—checklist of items that should be included in reports of observational studies

	Item No.	Recommendation	Relevant text from manuscript	
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	Title; Abstract, paragraph 2	
		(b) Provide in the abstract an informative and balanced summary of what was done and what was found	Abstract, paragraph 2-4	
Introduction				
Background/rationale	2	Explain the scientific background and rationale for the investigation being reported	Introduction, paragraph 1-4	
Objectives	3	State specific objectives, including any prespecified hypotheses	Introduction, paragraph 4	
Methods				
Study design	4	Present key elements of study design early in the paper	Methods, paragraph 1	
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection	Methods, paragraph 1, 3;	
Participants	6	(a) Cohort study—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants	Methods, paragraph 1;	
		(b) Cohort study—For matched studies, give matching criteria and number of exposed and unexposed Case-control study—For matched studies, give matching criteria and the number of controls per case	Not applicable	
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable	Methods, paragraph 3-6;	
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group	Methods, paragraph 3-7;	
Bias	9	Describe any efforts to address potential sources of bias	Methods, paragraph 6, 8-9;	
Study size	10	Explain how the study size was arrived at	Methods, paragraph 1-2; S1	

25/08/2021 1

Quantitative	11	Explain how quantitative variables were handled in the analyses. If applicable,	Methods, paragraph 6, 8-9;
variables		describe which groupings were chosen and why	
Statistical	12	(a) Describe all statistical methods, including those used to control for	Methods, paragraph 8-9;
methods		confounding	
		(b) Describe any methods used to examine subgroups and interactions	Methods, paragraph 8-9;
		(c) Explain how missing data were addressed	S7 Table
		(d) Cohort study—If applicable, explain how loss to follow-up was addressed	The register data were
		Case-control study—If applicable, explain how matching of cases and controls	virtually complete.
		was addressed	
		Cross-sectional study—If applicable, describe analytical methods taking account	
		of sampling strategy	
		(\underline{e}) Describe any sensitivity analyses	Methods, paragraph 8-9
Results			
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers	S1 Fig
		potentially eligible, examined for eligibility, confirmed eligible, included in the	
		study, completing follow-up, and analysed	
		(b) Give reasons for non-participation at each stage	Not applicable
		(c) Consider use of a flow diagram	S1 Fig
Descriptive data	14*	(a) Give characteristics of study participants (eg demographic, clinical, social)	Results, paragraph 1; Table 1,
		and information on exposures and potential confounders	S4 Table
		(b) Indicate number of participants with missing data for each variable of interest	Table 1, S4 Table, S5 Table
		(c) Cohort study—Summarise follow-up time (eg, average and total amount)	Results, paragraph 2
Outcome data	15*	Cohort study—Report numbers of outcome events or summary measures over	Results, paragraph 2; Table 2
		time	
		Case-control study—Report numbers in each exposure category, or summary	NA
		measures of exposure	
		Cross-sectional study—Report numbers of outcome events or summary measures	NA
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates	Results, paragraph 2-4; Table
		and their precision (eg, 95% confidence interval). Make clear which confounders	2, Table3
		were adjusted for and why they were included

^{*}Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
