## S7 Table. Crude death rates due to RHD in the general population with sensitivity analyses in Fiji, 2008–2012.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Cohort</th>
<th>Observed deaths</th>
<th>Excess deaths</th>
<th>SMR* (95% CI)</th>
<th>CDR† (95% CI) per 100,000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Primary analysis (≥50% prob.‡)</td>
<td>2619</td>
<td>430</td>
<td>378</td>
<td>8.3 (7.5–9.0)</td>
<td>9.1 (8.2–10.1)</td>
</tr>
<tr>
<td>Tolerant linkage (≥10% prob.‡)</td>
<td>2644</td>
<td>445</td>
<td>393</td>
<td>8.6 (7.8–9.4)</td>
<td>9.5 (8.6–10.4)</td>
</tr>
<tr>
<td>Stringent linkage (≥90% prob.‡)</td>
<td>2595</td>
<td>418</td>
<td>369</td>
<td>8.0 (7.3–8.8)</td>
<td>8.9 (8.0–9.8)</td>
</tr>
<tr>
<td>2008–2010 data</td>
<td>2588</td>
<td>269</td>
<td>215</td>
<td>5.0 (4.4–5.6)</td>
<td>8.6 (7.5–9.9)</td>
</tr>
<tr>
<td>2011–2012 data§</td>
<td>2333</td>
<td>155</td>
<td>137</td>
<td>8.4 (7.1–9.8)</td>
<td>8.2 (6.9–9.8)</td>
</tr>
</tbody>
</table>

* SMR, Standardized mortality ratio; † CDR, Crude death rate from RHD in the general population per 100,000 person-years before age 70 years; ‡ Probability threshold for two records to be considered a match used in all stages of the record-linkage process; § Extra-linkage step required because death-certificates not index by national health number.
