S3 Fig. Deviance distributions for the different models.

Acknowledgments

LACC is grateful to Marinella Capriati and colleagues in the Zeeman Institute for Systems Biology and Infectious Disease Epidemiology Research at the University of Warwick, in particular Matt Keeling, Orin Courtenay, Panayiota Touloupou, Joaquin Prada, Renata Retkute, Sam Brand, Erin Dilger and Ron Crump, for very helpful discussions regarding Bayesian inference and interpretation of the data. LACC is thankful to Tim Pollington of the Centre for Complexity Science, University of Warwick, and Allen Hightower for help with producing figures and mapping.
