

## CORRECTION

# Correction: Double burden of maternal and child malnutrition and socioeconomic status in urban Sri Lanka

Chisa Shinsugi, Deepa Gunasekara, N. K. Gunawardena, Wasanthi Subasinghe, Miki Miyoshi, Satoshi Kaneko, Hidemi Takimoto

There are formatting errors in Tables 3 and 4. In addition, there is an error in the caption for [Table 3](#). Please see the correct tables and captions here.

\*\*\* p &lt; 0.001,

\* p &lt; 0.05,

Rs.: Sri Lankan Rupee, BMI: body mass index, aOR: adjusted odds ratio; 95% CI: 95% confidence interval

<sup>a</sup>Model 1: Crude analysis. Each variable was separately entered into the model. Household equivalent income (HEI) was calculated as household income divided by the square root of the number of people per household.<sup>b</sup>Model 2: For multiple regression, child sex, maternal education, maternal employment status, HEI, maternal age, and maternal nutritional status were forced into the model, and selected by backward stepwise selection with a 0.35 of significant level of removal from the model. Only the selected variables were used for calculating aOR.<https://doi.org/10.1371/journal.pone.0230785.t002>
