

EDITORIAL NOTE

Editorial Note: Prevalence and factors associated with early resumption of sexual intercourse among postpartum women: Systematic review and meta-analysis

The *PLOS One* Editors

The *PLOS One* Editors issue this Editorial Note because this article [1] was identified as one of a series of submissions for which we have concerns about aspects of the peer review process. Readers are advised to interpret the article [1] with caution.

The Editors have no evidence of any author involvement in the peer review concerns.
