Correction

Correction: Interaction between Age and Obesity on Cardiomyocyte Contractile Function: Role of Leptin and Stress Signaling

The PLOS ONE Staff

The middle two panels of Figure 2 are incorrect. The authors have provided a corrected version of Figure 2 below.

Figure 2. Light microscopic images of cardiomyocytes freshly isolated from young (4-month-old) and aging (12- or 18-month-old) lean (C57) and *ob/ob* mice. 200x, scale bar = 100 μ m. doi:10.1371/journal.pone.0010085.g002
