CORRECTION

Correction: Characterization of Different Substituted Carboxymethyl Starch Microgels and Their Interactions with Lysozyme

The PLOS ONE Staff

There is an error in the first sentence of the “Saturated protein uptake capacity” subsection of the Materials and Methods. The correct sentence is: Dry gel particles (3 mg) were suspended in 7 mL of buffer at various pH with 3 mL of 10 mg/mL protein solution and gently stirred for 4 h.

There are errors in the legend for [Fig. 3](#), “TGA and the derivative TGA curves of CMS and microgels for various degrees of substitution (DS).” [Fig. 3](#) and the complete, correct [Fig. 3](#) legend are below.

Fig 3. TGA and the derivative TGA curves of CMS and microgels for various degrees of substitution (DS). a, b, and c are CMS of DS 0.95, 0.67, and 0.31, respectively. A, B, and C are microgels of DS 0.95, 0.67, and 0.31, respectively.
