

EXPRESSION OF CONCERN

Expression of Concern: *Hcn1* Is a Tremorgenic Genetic Component in a Rat Model of Essential Tremor

The PLOS ONE Editors

The Funding Statement for this article [1] states that the study received funding from the Smoking Research Foundation, which according to [2] has received financial support from the tobacco industry. In light of this issue the PLOS ONE article [1] does not comply with the journal's policy on Funding from Tobacco Companies [3] which was implemented in 2010. Therefore, the PLOS ONE Editors issue this Expression of Concern.

We regret that this concern was not identified and addressed prior to the article's [1] publication.
