Human per-amino acid GC3 vs GC3 graphs

Supplemental data for the publication Palidwor et al, 2010

This file contains graphs of per-amino acid GC3 vs GC3 for human protein coding genes based on Ensembl v54_36p.

The x-axis of each graph is GC3, the y-axis is protein GC3 (per-amino acid). Each point represents a single protein coding gene.

The blue line is the model prediction, the red line a loess fit to the observed data.
- cys (GC3)
- ile (GC3)
- val (GC3)
- pro (GC3)
- thr (GC3)
- ala (GC3)
- gly (GC3)
- arg (GC3)
