Supplementary Figure 2

**Graph Description:**

- **Y-axis:** IFNγ production (pg/mL)
- **X-axis:** Time (hours)

**Legend:**
- IL12+IL18

**Time Points:**
- 0h
- 2h
- 4h
- 6h
- 8h
- 10h
- 12h
- 24h

**Data Points:**
- Bars at each time point represent the IFNγ production levels.
- Symbols and error bars indicate variability in the data.

**Note:** The graph illustrates the IFNγ production levels over 24 hours for IL12+IL18 treatments at different time points.
