S5 Figure

![Graph showing HCV RNA levels over days post treatment with different treatments. The x-axis represents days post treatment (1, 2, 3), and the y-axis represents HCV RNA levels (RLU). The graph includes lines for Mock, HCV, HCV + IFN 10u/ml, HCV + IFN 100u/ml, and HCV + IFN 1000u/ml. The data points are marked with stars to indicate statistical significance (*** p < 0.001, ** p < 0.01, * p < 0.05).]
