Fraction of asthma variability explained by exposure*

- Infant antibiotic use
- Infant bronchiolitis healthcare visit
- Having older siblings
- Maternal asthma
- Infant gender
- Maternal age at delivery
- Infant race
- Mode of delivery
- Birth weight
- Gestational age
- Maternal UTI
- Maternal GBS
- Maternal smoking during pregnancy

*Additional risk factors that are not plotted include: birth hospitalization length of stay, birth year, birth month, having chronic lung disease, having congenital heart disease, maternal education, and study site
