**S3 Table.** Bivariate correlations (Pearson r) for unmanipulated factors in the experiment. Abbreviations for enzymes are as follows: CBH: cellobiohydrolase, BG: beta-glucosidase, AG: alpha-glucosidase, NAG: N-acetyl-glucosaminidase, BX: beta-xylosidase, and AP: acid phosphatase. Bolded values were significant at $P < 0.05$ after Bonferroni correction.
