Dear Dr. Trento,

Thank you so much for your prompt response, this was exactly what we needed.

All the best,
Sofia

Subject: Re: Question about your 2012 article

Dear Sofia,

thanks for your message. To answer your question I consulted our statisticians, who read a copy. Attached is the table with the data you requested. We remain at disposal for others questions.

Best regards,
Marina Trento

Dear Dr. Trento,

I am a graduate student in Epidemiology currently working on a systematic review on cognition in people with diabetes and depression (see our protocol for more information). We have included your 2012 article entitled "A cross-sectional survey of depression, anxiety, and cognitive function in patients with type 2 diabetes" in our final screening, along with 22 other articles. In reporting the results of the third multivariate model you state that "None of the clinical independent variables correlated with MMSE" but do not state any specific coefficients or p-values. In order to compare these results with those of the other papers we are including, it would be helpful to have the exact coefficients and p-values for this regression analysis. Might you be able to send us those estimates?
Thank you very much in advance,

Sofia M. Danna
