S2 Fig

S2 Fig. Upper panel: Raw data of Cs-137 values (left Y-axis in log scale) in seawater from the offshore box (rectangle delineated by Longitude 141.6° to 144.5°E and latitude 35.3°N to 38.6°N). Black dots: values above the LoD; vertical bars: censored values (<LoD). Lower panel: Filled diamonds and vertical bars: monthly averages + SD computed without the censored values because they were either very few or too many (>80%). Dark grey and light grey areas (right Y-axis): the total number of values and the number of censored values, respectively.
