Invited participants in the Diet, Cancer and Health (n=160,725)

Participation in the Diet, Cancer and Health (n=57,053)

Randomly drawn subcohort (n=3500)

Excluded:
- Cancer before entry (n=564)
- MI or cardiac arrest before entry (n=900)
- Incomplete questionnaires (n=42)

Invited participants in the Diet, Cancer and Health (n=160,725)

Randomly drawn subcohort (n=3500)

Excluded:
- Cancer before entry (n=564)
- MI or cardiac arrest before entry (n=900)
- Incomplete questionnaires (n=42)

Subcohort non-cases (n=3255)

Subcohort cases (n=154)

Non-subcohort cases (n=2222)

Non-subcohort non-cases (n=49,916)

Subcohort non-cases (n=3023)

Subcohort cases (n=133)

Non-subcohort cases (n=2015)

Excluded:
- Missing information on exposure (n=201)
- Missing information on confounders (n=31)

Excluded:
- Missing information on exposure (n=186)
- Missing information on confounders (n=42)

S1 Fig. Flowchart for the selection of subcohort participants and cases: Diet, Cancer and Health cohort, Denmark. MI indicates myocardial infarction.
