List of R packages

The calculations were done using packages CLUSTER (Maechler et al., 2014), RANDOM-FOREST (Liaw and Wiener, 2002), and PSYCH (Revelle, 2016) in R (R Core Team, 2014). For mapping and plotting we used packages RASTER (Hijmans, 2015), GGPLOT2 (Wickham, 2009) and RWORLDXTRA (South, 2012).
