S1 Fig. Flow chart of the sample analysis.

- **Raw propolis**
  - Extraction with 70\% EtOH
  - Liquid-liquid extraction
  - GC/MS silylation
  - Crude extract
    - Antimicrobial and DPPH tests
    - Liquid-liquid extraction
      - PE extract
        - Chromatography (VLC, CC, prep. TLC)
        - Isolated compounds (5, 6, 7, 8, 10, 11 and 12)
        - silylation
        - GC/MS
      - DEE extract
        - Chromatography (VLC, LPLC, CC, prep. TLC)
        - Isolated compounds (1, 2, 3, 4, 8 and 9)
        - Antimicrobial and DPPH tests
