Supplemental Figure S4: Gating strategy for CD4⁺ α4β7⁺ T cells stained with an α4-specific (clone 7.2R) and a β7-specific (clone FIB504) antibody.

A Gating strategy: Live cells, single cells, lymphocytes, CD3⁺, CD4⁺ T cells, α4β7⁺ CD4⁺ T cells (Q2), B Fluorescence minus one (FMO) controls used for gating of α4⁺β7⁺CD4⁺ T cells.
