

Correction

Correction: PaFlexPepDock: Parallel Ab-Initio Docking of Peptides onto Their Receptors with Full Flexibility Based on Rosetta

The *PLOS ONE* Staff

The first 8 values in column 3 of Table 1 are incorrect. The authors have provided a corrected version of Table 1 here.

Cluster performance of peptide modeling onto unbound protein receptor structures. For each pair, left and right column are generated by PaFlexPepDock and abFlexPepDock respectively.

[†]The best pep_if among all sampled decoys.

[‡]The best pep_if of the representing prediction among top-10 clusters.

[§]The rank of the first cluster with near native structure.
