

**S1 Fig. Batch effects between baseline and 5-year follow up samples.**

**S1 Fig. Batch effects between baseline and 5-year follow up samples.**

**S1 Fig. Batch effects between baseline and 5-year follow up samples.**

**Batch effects between baseline and 5-year follow up samples.** Boxplots of samples summarized for each of the 15 GHS individuals measured in distinct batches (BL and BLFU) and with RNA extracted and measured 5 years later. Distributions clearly indicate that batch effects outweigh biological effects.
