

## S10 Supporting Information. Scatter plots of CV for continuous age, BMI, and CPD.

### Age

CV of 8-isoPGF<sub>2 $\alpha$</sub>  /creatinine (pmol/mg), 8-isoPGF<sub>2 $\alpha$</sub>  (pmol/mL), 8-isoPGF<sub>2 $\alpha$</sub>  (TNE corrected,  $\times 10^3$ ), and 8-isoPGF<sub>2 $\alpha$</sub>  (uL/mg, creatinine and TNE corrected) vs. age

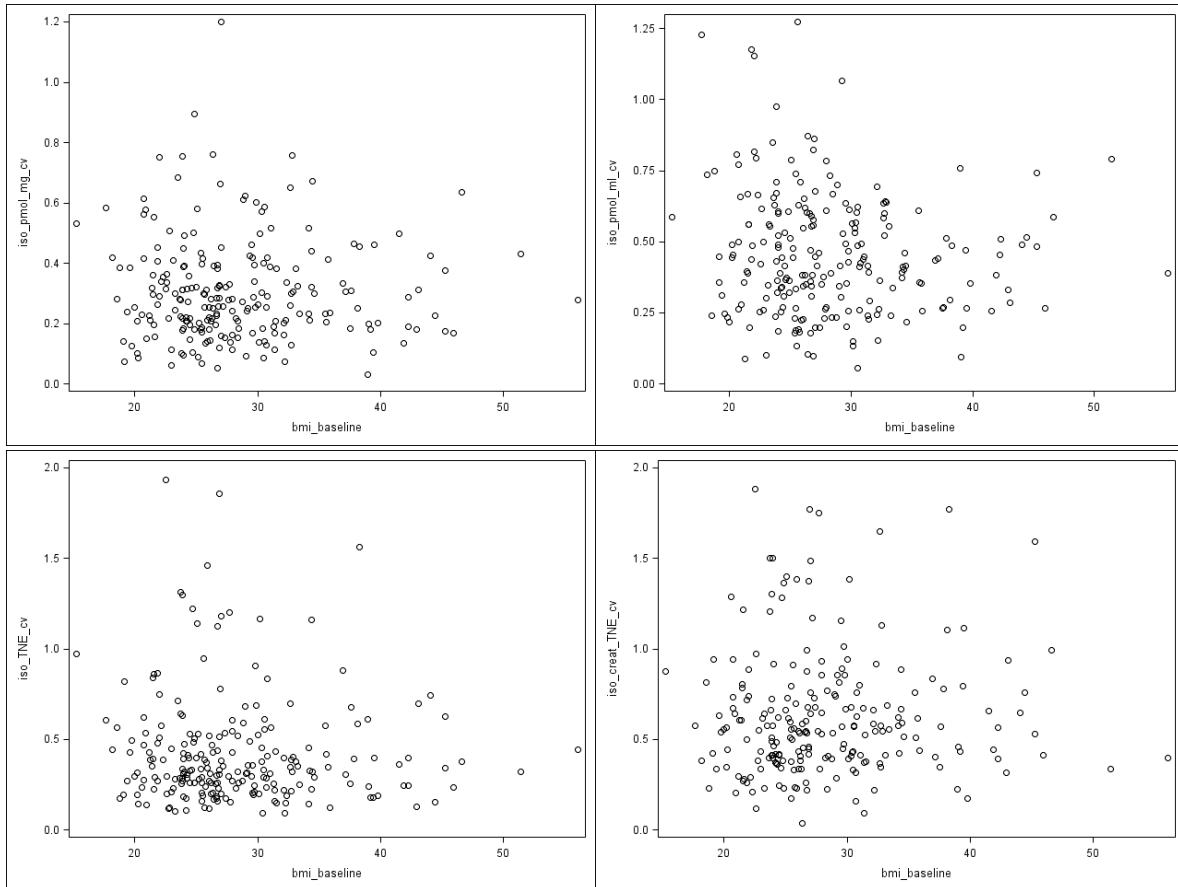

**CV of PGEM/creatinine (pmol/mg), PGEM (pmol/mL), PGEM (TNE corrected,  $\times 10^3$ ), and PGEM (uL/mg, creatinine and TNE corrected) vs. age**

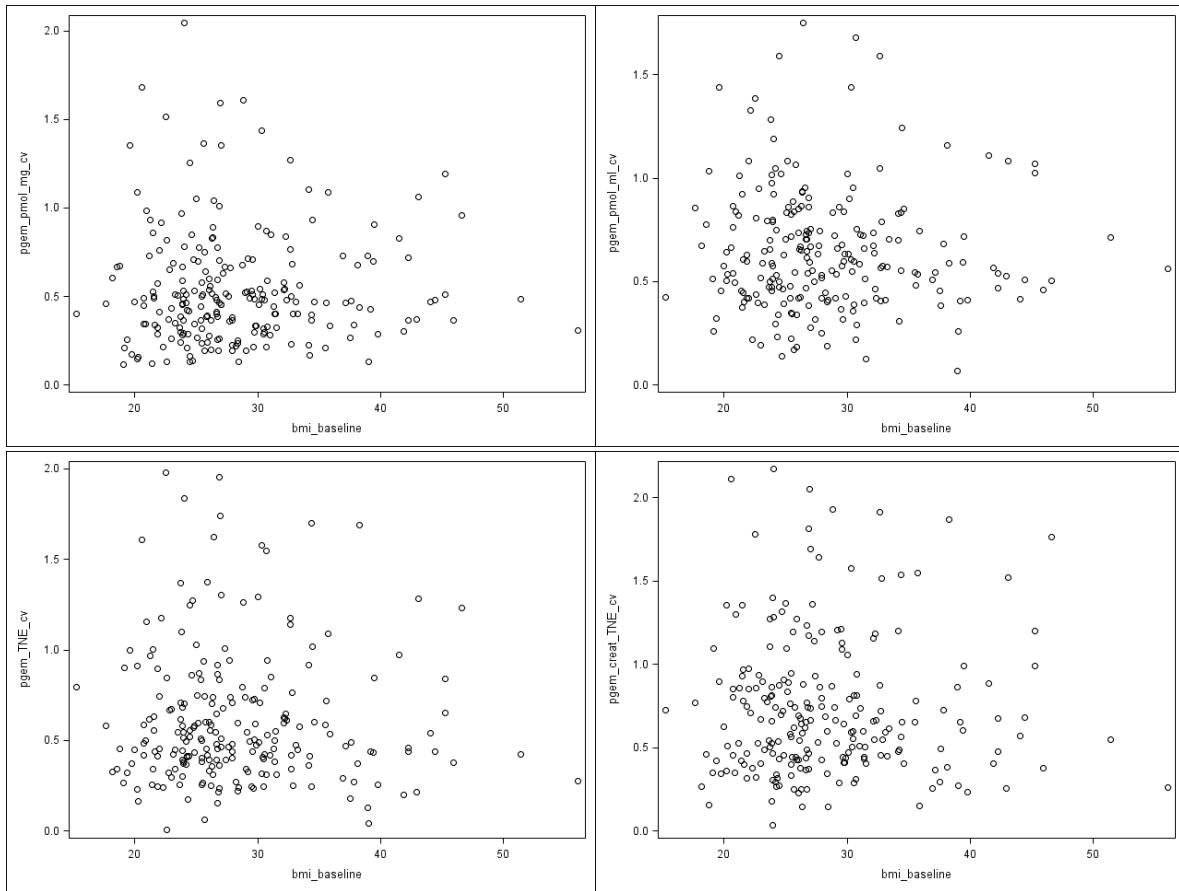

## BMI

**CV of 8-isoPGF<sub>2 $\alpha$</sub>  /creatinine (pmol/mg), 8-isoPGF<sub>2 $\alpha$</sub>  (pmol/mL), 8-isoPGF<sub>2 $\alpha$</sub>  (TNE corrected,  $\times 10^3$ ), and 8-isoPGF<sub>2 $\alpha$</sub>  (uL/mg, creatinine and TNE corrected) vs. BMI**

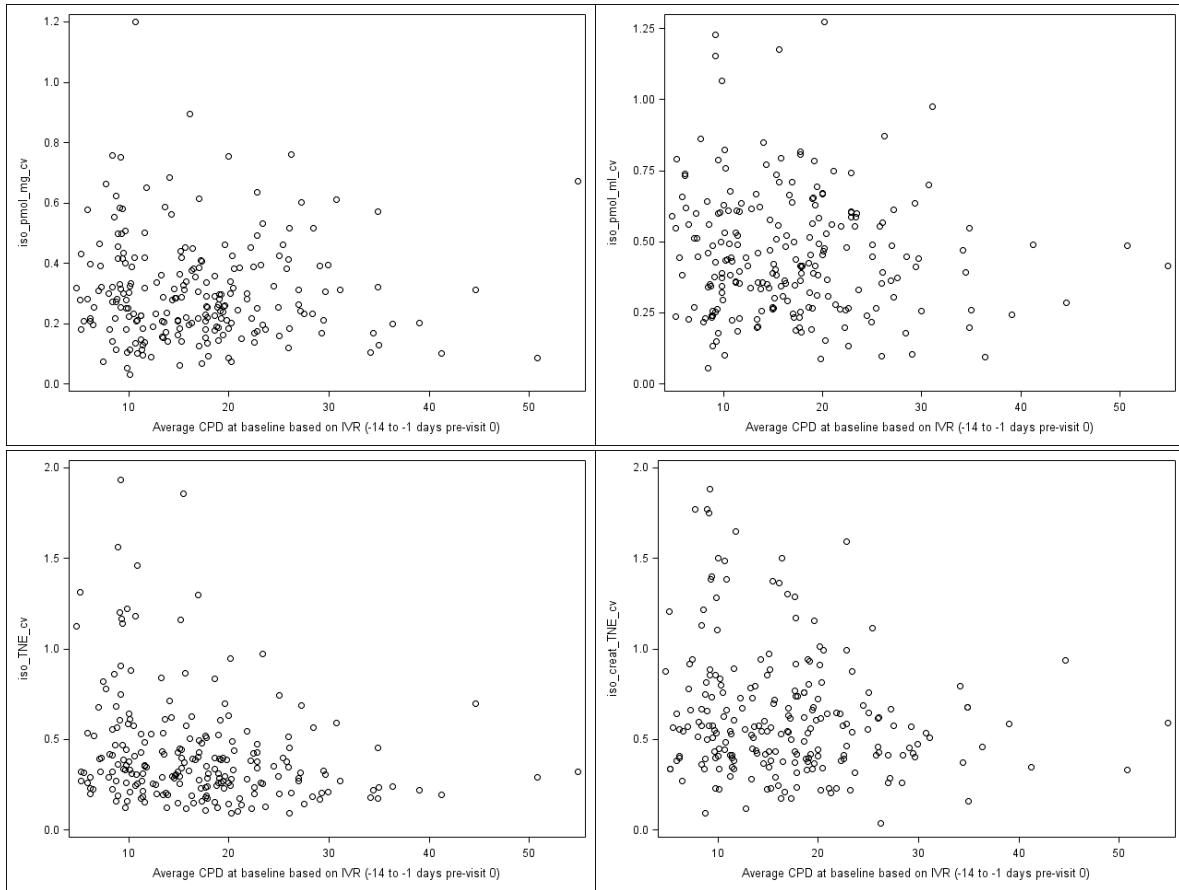

**CV of PGEM/creatinine (pmol/mg), PGEM (pmol/mL), PGEM (TNE corrected,  $\times 10^3$ ), and PGEM (uL/mg, creatinine and TNE corrected) vs. BMI**

## CPD

**CV of 8-isoPGF<sub>2 $\alpha$</sub>  /creatinine (pmol/mg), 8-isoPGF<sub>2 $\alpha$</sub>  (pmol/mL), 8-isoPGF<sub>2 $\alpha$</sub>  (TNE corrected,  $\times 10^3$ ), and 8-isoPGF<sub>2 $\alpha$</sub>  (uL/mg, creatinine and TNE corrected) vs. CPD**

**CV of PGEM/creatinine (pmol/mg), PGEM (pmol/mL), PGEM (TNE corrected,  $\times 10^3$ ), and PGEM (uL/mg, creatinine and TNE corrected) vs. CPD**
