

S7 Table. Fully (>99%) and strongly conserved (>75%) residues across all bacterial β -glucan synthases used in the initial, unrefined phylogenetic analysis, grouped by secondary structure.

| | Fully Conserved (>99%) | | | Strongly Conserved (>75%) | | |
|--|------------------------|--------|--------|---------------------------|--------|---------------|
| TM1 | Tyr80 | Arg84 | | Trp83 | Thr88 | |
| TM2 | Glu108 | | | | | |
| Pre-β1 | Pro140 | | | | | |
| β1 | Asp143 | | | Val142 | Phe145 | |
| β1-α1 | Tyr149 | Glu151 | | Thr148 | Asn150 | |
| α1 | | | | Thr159 | Ala163 | |
| α1-β2 | | | | Tyr168 | Pro169 | |
| β2 | | | | Val175 | | |
| β2-α2 | Asp179 | Asp180 | | | | |
| α3 | | | | Cys209 | | |
| β3 | | | | Tyr216 | Thr218 | |
| β3-α4 | Arg219 | Asn222 | Ala225 | | | |
| α4 | Lys226 | Gly228 | Asn229 | Ala227 | Asn231 | |
| β4-β5 | Asp246 | Asp248 | | Ala247 | | |
| β5 | Pro251 | | | | | |
| α5 | | | | Leu256 | Phe263 | Asp266 |
| β6 | Gln273 | | | Val272 | | |
| β6-α6 | Pro275 | | | Thr274 | Asn280 | Asp282 |
| α6 | Pro283 | Asn287 | | Leu288 | | |
| α6-α7/IF1 | | | | Glu297 | | |
| α7/IF1 | Phe301 | Asp310 | | | | |
| α7/IF1-β7 | Gly319 | | | Trp312 | Phe316 | |
| β7 | | | | Arg325 | | |
| α8 | Arg326 | | | | | |
| α8-α9 | | | | Gly333 | Gly334 | |
| α9 | Glu342 | Asp343 | | | | |
| α9-β8 | | | | Gly354 | | |
| β9 | Gly367 | | | | | |
| β9-α10/IF2 | Leu368 | | | | | |
| α10/IF2 | Gln379 | Arg380 | Arg382 | | | |
| | Trp383 | Gly386 | Gln389 | | | |
| α10/IF2-TM3 | | | | Gly401 | | |
| TM3 | Pro430 | | | Gln406 | Arg407 | Tyr433 |
| TM4-TM5/IF3 | | | | Pro473 | | |
| Gating loop | Pro498 | Phe503 | Val505 | | | |
| | Thr506 | Lys508 | | | | |
| TM7 | | | | Trp558 | | |
| Post-TM7 | | | | Glu575 | | |

RsBcsA residue numbering used. See **S2** and **S4 Fig.** for positioning of the secondary structures. Amino acids in bold are those identified in simulations to form stacking interactions with the (1,4)- β -glucan and (1,3)- β -glucan chains within the RsBcsA and AtumCrdS TM channel, respectively (see **Table 2**).
