

Supplementary Table S1. Sample points for proteome analyses of the different experiments.

| experiment | control samples ¹ | | stressed samples ¹ | | | | | | | |
|---------------------|------------------------------|-----|-------------------------------|-----|-----|-----|-----|-----|-----|------|
| | 0' | 60' | 1' | 5' | 10' | 20' | 30' | 40' | 60' | 120' |
| hydrogen peroxide | •• | | | •• | •• | | •• | •• | •• | |
| diamide | •• | | | •• | •• | | •• | •• | •• | |
| paraquat | •• | | | •• | •• | | •• | | •• | •• |
| nitric oxide | •• | | •• | •• | •• | | •• | | •• | |
| fermentation | •• | •• | | | •• | •• | •• | | •• | |
| nitrate respiration | •• | •• | | | •• | •• | •• | | •• | |
| heat | ••• | | | ••• | ••• | | •• | | ••• | |
| puromycin | ••• | ••• | | ••• | ••• | | ••• | | ••• | |
| mupirocin | •• | | | | •• | | •• | | •• | |

¹ Samples were harvested at the indicated time points (in minutes) before and after exposing the culture to the different conditions at OD_{500nm} 0.5 (number of • indicates the number of biological replicates).
