ARTICLE INCLUSION/EXCLUSION RATIONALE

Does this article meet inclusion criteria?

YES. Requires all categories to meet criteria:
- ☐ Human subject
- ☐ Individual case data available (including meta-analysis articles)
- ☐ Laboratory-confirmed influenza A (H5N1) virus OR suspected H5N1 case amongst known case cluster.
  - o H5N1 culture *or*
  - o H5N1 PCR study *or*
  - o Antibody titer 1:80

NO. Does not meet criteria for these reasons:
- ☐ Non-human: molecular or animal
- ☐ Individual case details not provided
- ☐ Insufficient epidemiological data

COMPLETE THE FOLLOWING IF THE ARTICLE MET INCLUSION CRITERIA:

STUDY DESIGN INFORMATION

Describe the study design:

PRE-ADMISSION PREDICTOR VARIABLES DESCRIBED

Demographic variables:
- ☐ Country where A (H5N1) virus infection identified
- ☐ Per capita government expenditure on health (PCGEH)
- ☐ Season
- ☐ Age
- ☐ Sex
- ☐ Body Mass Index (BMI)
- ☐ Co-morbidities

Infection-related variables:
- ☐ Case is part of a cluster of known cases
- ☐ Contact with poultry prior to symptom onset
- ☐ Delay from symptom onset to hospitalization (days)

POST-ADMISSION PREDICTOR VARIABLES DESCRIBED

Hospitalization variables:
- ☐ Laboratory data
- ☐ Presence of pneumonia
- ☐ Acute respiratory distress syndrome (ARDS)
- ☐ Mechanical ventilation

OUTCOME VARIABLES DESCRIBED

- ☐ Mortality
