

**A****B**

**S3 Fig. ATC-induced cADPR and NAADP production in pancreatic  $\beta$  cell.** Islets were treated with/without ATC(100, 400, 700  $\mu$ M, and 1  $\mu$ M) and measured cADPR (A) and NAADP (B) levels. \*,  $P < 0.05$  versus CON cADPR and NAADP level. All data are expressed as the Mean  $\pm$  SEM.
