

S4 Figure. Fyn inhibitor PP2 does not influence MBP protein expression

S4 Figure Legend. Fyn inhibitor PP2 does not influence MBP protein expression. (A) Graph indicates the MBP band intensities normalized with the α -Tubulin and express as % of variation compared to NT. (B) Representative immunoblot of Oli-neuM cells treated with 10 μ M Glucocorticoids and 10 μ M PP2 for 48h. Data are presented as the mean \pm SD (n = 3) and statistical significance was analysed by a Student's t test with *P = 0.03262.
