

(A) Bid: Caco-2

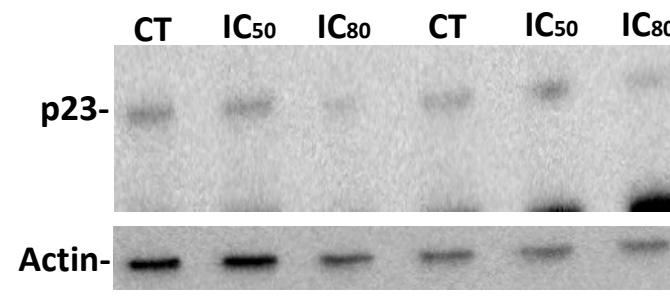

Bid: HT29

(B) Bax: Caco-2

Bax: HT29

S1 Figure. Supplementary figure 1. (A) Left: Western blotting of the levels of Bid (p24) and t-Bid (p15) in Caco-2 cells. **Right:** Western blotting of the levels of Bid (p24) in HT29 cells. Note that not levels of t-Bid (p15) were detected in this cell line. Cells were treated with maslinic acid (MA) at IC₅₀ and IC₈₀ concentrations for 4h. **(B) Left:** Western blotting of levels of Bax (p23) in Caco-2 cells. Note that not changes in Bax levels were observed in this cell line. **Right:** Western blotting of levels of Bax (p23) in HT29 cells. Cells were treated with maslinic acid (MA) at IC₅₀ and IC₈₀ concentrations for 4h.
