

**Fig. S3. Detection of the target fluid in mixtures containing 0, 20, 40, 60, 80 and 100 percent DNA of the specific fluid.** The observed methylation value (●) and the expected one (□) of the mixtures are compared. For peripheral blood: (A) Blut1-f and (B) Blut2-f, for menstrual blood: (C) Mens1, for saliva: (D) Spei1 and (E) Spei2, for vaginal fluid: (F) Vag1 and (G) Vag2, for sperm: (H) Sperm1 and (I) Sperm2.
