

S1 Table. D-PLACE societies per language family. Currently, D-PLACE contains cultural data for over 1400 societies, drawn from two major cross-cultural datasets (the Ethnographic Atlas and Binford Hunter-Gatherer datasets). The societies are associated with 1202 unique languages and approximately 1315 dialects. Linguistic information for each society is available for download through D-PLACE, with all languages and dialects linked to Glottolog identifiers (glottolog.org).

Language family	Societies in Ethnographic Atlas dataset	Societies in Binford Hunter-Gatherer dataset	Unique languages	Unique dialects
Abkhaz-Adyge	2	0	2	2
