S6 Table. 6: Interrupted time series, baclofen.

|  | Slope $\left(\times \mathbf{1 0}^{-3}\right)(95 \% \mathrm{CI})$ | $\mathbf{p}$ | Intercept $(95 \% \mathrm{CI})$ | $\mathbf{p}$ |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| LDN x 1 | -1.0 | $(-3.1$ to 1.1$)$ | 0.371 | 0.40 | $(-.50$ to 1.29$)$ | 0.387 |
| LDN x 2-3 | -0.9 | $(-3.3$ to 1.5$)$ | 0.460 | 0.33 | $(-0.67$ to 1.35$)$ | 0.518 |
| LDN x 4+ | -1.4 | $(-2.8$ to 0.0$)$ | 0.047 | -0.91 | $(-1.50$ to -0.32$)$ | 0.003 |

Difference in slope (coefficient) and intercept two years before and two years after first low dose naltrexone (LDN) dispense. Sum of DDD/patient in 30 days intervals in three groups with different LDN exposure.
