

Fig S3: Proportion of savings depending on the investment options and the endowments. (Left) Proportion of savings, mean and standard error of the mean (95% CI), at the end of the game per endowment and investment treatment. (Right) Differences of remaining capital –savings (S)– between the treatment 0-1-2-3-4 and 0-2-4 per endowment ($S_{01234} - S_{024}$ per endowment in each round).
