Primary bile acid biosynthesis
Secondary bile acid biosynthesis
Ascorbate and aldarate metabolism
Chlorocyclohexane and chlorobenzene degradation
Galactose metabolism
Sulfur relay system
C5-Branched dibasic acid metabolism
Bladder cancer
beta-Lactam resistance
Biosynthesis and biodegradation of secondary metabolites_Unclassified
Pentose phosphate pathway
ABC transporters
Chagas disease (American trypanosomiasis)
Porphyrin and chlorophyll metabolism
African trypanosomiasis
Valine, leucine and isoleucine biosynthesis
Polyketide sugar unit biosynthesis
Selenocompound metabolism
Ether lipid metabolism
Carbohydrate metabolism_Unclassified
Inorganic ion transport and metabolism_Unclassified
Biosynthesis of vancomycin group antibiotics
Ubiquitin system
Bacterial invasion of epithelial cells
Metabolism of cofactors and vitamins_Unclassified
Biotin metabolism
Cell division_Unclassified
Starch and sucrose metabolism
Fructose and mannose metabolism
Other ion-coupled transporters_Unclassified
Shigellosis
Pathogenic Escherichia coli infection
Function unknown_Unclassified
Lysine biosynthesis
Isoquinoline alkaloid biosynthesis
Thiamine metabolism
Amino acid metabolism_Unclassified
Photosynthesis proteins
Photosynthesis
Others_Unclassified
Novobiocin biosynthesis
Ion channels
Xylene degradation
Lipoic acid metabolism
Proximal tubule bicarbonate reclamation
alpha-Linolenic acid metabolism
Lysine degradation
Geraniol degradation
Valine, leucine and isoleucine degradation
Huntington's disease
Protein processing in endoplasmic reticulum
Secretion system
Aminobenzoate degradation
Fatty acid biosynthesis
Butanoate metabolism
Prostate cancer
Citrate cycle (TCA cycle)
Glycan biosynthesis and metabolism_Unclassified
Progesterone-mediated oocyte maturation
Antigen processing and presentation
Limonene and pinene degradation
NOD-like receptor signaling pathway
Naphthalene degradation
Zeatin biosynthesis
Lipid biosynthesis proteins
Restriction enzyme_Unclassified
Transcription machinery
Cell cycle - Caulobacter
Pathways in cancer
Carbon fixation pathways in prokaryotes
Benzoate degradation
D-Alanine metabolism
Energy metabolism_Unclassified
Translation factors
DNA repair and recombination proteins
Ethylbenzene degradation
Ribosome
DNA replication
Drug metabolism - other enzymes
DNA replication proteins
Pyrimidine metabolism
Homologous recombination
Chromosome
Mismatch repair
Translation proteins_Unclassified
One carbon pool by folate
