Comparison of the Fv1 sequence from different mice. Predicted amino acid sequence encoded by the \textit{Fv1} gene from 20 different sources, compared to the \textit{Fv1}\textsuperscript{b} allele found in C57BL mice. Source designations are as given in Table 1A. Single letter amino acid code; \textbf{.} = identical to Fv1b; \textbf{-} = deletion; \textbf{*} = stop.
