**Figure S5:** IM patients and huNSG mice infected with EBV retain unique transcriptional characteristics. 

**A**) Microarray data from Figure 3 examining genes found in the GO term for T cell mediated cytotoxicity (GO:0001913). Data are separated by species. 

**B**) Microarray data from Figure 3 examining genes found in the GO term for T cell costimulation (GO:0031295), separated by species.
