

S8 Table

Ordinary least squares estimate of a county's annual air quality regulation value per square mile regresses on the county's standardized distance to nearest large urban area(s) and the county's standardized carbon storage as of 2010-2012 per square mile (as a proxy for tree biomass abundance). Column (I) gives results of a model with standardized distance to the nearest *large* urban area, column (II) gives results with standardized average distance to nearest *five large* urban areas, column (III) gives results with standardized distance to the nearest urban area (regardless of size), and column (IV) gives results with standardized average distance to nearest *five* urban areas (regardless of size).

| | (I) | (II) | (III) | (IV) |
|---|--------------------|---------------------|--------------------|--------------------|
| Intercept | 26127*** (1312) | 26127*** (1304) | 26127 (1316) | 26127 (1314) |
| Standardized distance to nearest large urban area(s) | -8200*** (1360) | -11649*** (1376) | -5692*** (1328) | -7004*** (1356) |
| Standardized carbon storage value per square mile | 16050*** (1360) | 14494*** (1376) | 17431*** (1328) | 16485*** (1356) |
| N | 2925 | 2925 | 2925 | 2925 |
| R² | 0.073 | 0.084 | 0.067 | 0.070 |
