Figure S13 | Glyph data and its interpretation. ■ Traced from the data. ■ Inferred from the data or context. ■ Uncertain interpretation. Each glyph is numbered by its month number round the four-turn spiral of the 223-lunar month Saros Dial. The label after this denotes the fragment and position of the glyph—for example, F-3.2 means that the glyph was observed in Fragment F on Scale 3 (counting the four turns of the spiral from the inside) and it was the second glyph found round this scale. On the far right is the interpretation of the text.
